Brand New Book ***** Print on Demand *****.Excerpt from One Hundred Experiments in Elementary Agriculture for California Schools In this bulletin tile writer has attempted to give to teachers in connected form a full and suggestive series of experiments in elementary agriculture, dealing as fully as possible with the physics, chemistry, and biology of the subject. While the work outlined is well suited to the seventh and eighth grades of the elementary school and to the first year of the high school, it will be found that many of the experiments are intelligible to pupils of lower grades, and may profitably be performed by them. If given in the high school the writer would recommend that the entire course be covered in one year: if given in the grades, that Part I be given to the seventh grade and Part II to the eighth grade. In ungraded schools it might be well, especially if crowded for time, to give the work on Friday afternoons (allowing the pupils of the first two or three grades to withdraw), taking two years to complete the course. With pupils who have already done some work in the subject a number of the easier experiments may well be omitted, though repetition is better than lack of clearness in understanding. In some instances it may seem that exactly the same principle is illustrated by a number of experiments in this course, but on a closer examination it will be seen that each presents the same truth from a little different viewpoint, thus giving the pupil a breadth of understanding not otherwise attained. The materials necessary for the entire series of experiments may be purchased for a small outlay at tile...
