Business continuity planning (BCP) is planning which identifies the organizations exposure to internal and external threats and synthesizes hard and soft assets to provide effective prevention and recovery for the organization, whilst maintaining competitive advantage and value system integrity. It is also called Business continuity and Resiliency planning (BCRP). The logistical plan used in BCP is called a business continuity plan. The intended effect of BCP is to ensure business continuity, which is an ongoing state or methodology governing how business is conducted. In plain language, BCP is working out how to stay in business in the event of disaster. Typical incidents include local events like building fires, regional incidents like earthquakes or floods, or national incidents like pandemic illnesses. However, it is not limited to just that.
